

# Train to manage behaviour in dementia care

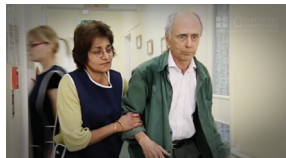

## Offer exceptional care with well trained staff

Developed with world renowned dementia experts, this course provides essential learning for carers.

It shows care professionals how to manage the behaviour of people with dementia in real life drama case studies that are both memorable and realistic.

In this highly engaging course, staff and managers can learn to improve the care provided to people with dementia with this excellent evidence based training material.

Knowing the constraints on time the course is online and can be completed at home or work. Learners will receive a certificate on completion.

As a training tool it offers excellent value at £39 per user including VAT

Discounts available on multiple users.
